SEE REVERSE SIDE FOR ADDITIONAL TERMS AND CONDITIONS

Additional Terms and Conditions

1. The cost of labor for two inspection is covered, excluding the labor costs for replacement of a compressor or heat pump reversing valve or labor for additional repair work not considered to be inspection. The cost of parts is not covered. Any repairs required will be brought to the attention of the owner before repairs are made. Every effort will be made to check systems for potential problems, but Dayco Heating & Air Conditioning is not responsible for any labor or parts should there be a malfunction in the system after inspection. Priority scheduling will be given.
 2. This agreement includes inspection of all control wiring between indoor and outdoor units and the thermostat, and power wiring and controls with the units. NOT included are external power wiring, circuit breakers and disconnects supplying electrical service for the units.
 3. This agreement provides for inspection of all functional components of the heating and air conditioning system, but does not include ductwork, structural supports or other sheet metal components.
 4. Should ownership of the residence where the covered equipment is located change, this fulfillment may be transferred to the new owner, upon notification in writing to Dayco Heating, Air & Electrical. Agreement automatically renewed until given written notification to Dayco Heating & Air Conditioning.
 5. Special consideration has been given in pricing cost of this contract taking into account two maintenances per year for residential.
 6. The fulfillment is good for one year and will be automatically renewed unless otherwise cancelled after the first year by the customer on signed contract.
 7. If program is cancelled prior to 12 months all discounts given must be paid back to Dayco Heating & Air Conditioning
-

EVAPORATOR COIL/BLOWER SECTION

Clean or Replace Air Filters (filter not included)
Clean Evaporator Coil
Inspect Blower Shaft and/or Motor Bearing
Lubricate Blower and/or Motor Bearing If Required
Tighten belt Condition and Tension
Test Blower Condition and Rotation
Test Motor Amp Draw

ELECTRIC HEAT

Test Sequencer/Contactor Condition and Operation
Test Amp Draw of Heating Elements
Test Fuse Link and Thermo-O-Disk Condition
Test Fan/Limit Control

GAS HEAT

Monitor Combustion Chamber Condition
Inspect for Leaks
Test Ignition and Start Up
Test Fire Control Relays and Safety Switch
Test Burner and Flame Operation
Monitor Draft Diverter setting and Draft over Fire
Monitor Air Control Setting (Combustion Air)
Test Induced Draft Blower

CONDENSER/REFRIGERANT CIRCUIT

Clean Condenser coil
Do Visual Inspection for Oil and Refrigerant Leaks
Monitor Operation of Refrigerant Controls
Run Test of Reversing Valve Operation
Inspect Fan and Motor Bearing
Lubricate Fan and Motor bearings, If Required
Test Fan Motor Amp Draw
Test Compressor Amp Draw
Check Noise and Vibration

SYSTEM CONTROLS

Test Thermostat Condition and Anticipator Setting
Test Contractor Condition
Test Defrost Cycle and Controls
Check Outdoor Thermostat Settings
Monitor High and Low Cutout
Monitor All Equipment Electrical Connections

EXTRAS

Clean Electronic Air Cleaner
Clean Humidifier
